INTEGRAL CALCULUS and DIFFERENTIAL EQUATIONS using MATLAB Scientific Books This book provides all the material needed to work on Integral Calculus and Differential Equations using MATLAB. It includes techniques for solving all kinds of integral and its applications for calculating lengths of curves, areas, volumes, surfaces of revolution... With MATLAB is possible solve ordinary and partial differential equations of various kinds, and systems of such equations, either symbolically or using numerical methods (Euler's method,, the Runge–Kutta method,…). It also describes how to implement mathematical tools such as the Laplace transform, orthogonal polynomials, and special functions (Airy and Bessel functions), and find solutions of differential equations in partial derivatives.
