The Evolution Revolution - Why Thinking People are Rethinking the Theory of Evolution Dr. Lee M. Spetner

This book is not an ordinary anti-Evolution discourse. It actually DESTROYS Evolutionary theory!

The book makes two important points:

- (1) It destroys Darwinian evolution and all its derivatives that rely on random heritable changes. From this it follows that evolutionary theory does not, for example, support Common Descent.
- (2) It offers a replacement theory, which relies on non-random heritable changes -- The Non-random Evolutionary Hypothesis (NREH). This hypothesis accounts for all observed examples of evolution. This theory does not, however, deal with origins.

How has evolutionary theory been destroyed?

Evolutionary theory that relies on randomness has been destroyed by noting that no one has been able to show that the evolutionary events according to the theory have a probability that is anything but so small as to be practically equivalent to zero. Unless the probability of events like Common Descent, and even just speciation, can be shown to be reasonably high, the theory is not a theory. This has never been shown, thus the theory is destroyed.

What about the evidence for evolution?

Evolution is usually inferred to have happened in the past from fossil evidence and from molecular similarities in the proteins and DNA of different species. But the book notes that inferences from circumstantial evidence require a valid theory to connect the inference to the evidence, and there is no valid theory. So that evidence does not support common descent.

What is the non-random hypothesis?

The book describes a mechanism for evolution that accounts for all evolution that has been observed, as distinguished from what has been inferred from circumstantial evidence and from what is often justified by mere stories that evolutionists spin to describe how evolution might have happened. Organisms, it turns out, have a built-in capacity to respond adaptively to environmental stress. The evolutionary changes that arise from these responses are not random and lead to adaptive evolutionary changes. The mechanism is described as to how this capability works. Many examples are given of the workings of this process.

From reader reviews:

Betty Lavery:

Book is usually written, printed, or illustrated for everything. You can realize everything you want by a publication. Book has a different type. As we know that book is important issue to bring us around the world. Adjacent to that you can your reading skill was fluently. A book The Evolution Revolution - Why Thinking People are Rethinking the Theory of Evolution will make you to end up being smarter. You can feel much more confidence if you can know about almost everything. But some of you think that will open or reading some sort of book make you bored. It's not make you fun. Why they are often thought like that? Have you trying to find best book or ideal book with you?

Cody Smith:

Do you certainly one of people who can't read enjoyable if the sentence chained inside the straightway, hold on guys this kind of aren't like that. This The Evolution Revolution - Why Thinking People are Rethinking the Theory of Evolution book is readable by means of you who hate the perfect word style. You will find the info here are arrange for enjoyable studying experience without leaving also decrease the knowledge that want to supply to you. The writer involving The Evolution Revolution - Why Thinking People are Rethinking the Theory of Evolution content conveys objective easily to understand by most people. The printed and e-book are not different in the information but it just different such as it. So , do you continue to thinking The Evolution Revolution - Why Thinking People are Rethinking the Theory of Evolution is not loveable to be your top listing reading book?

Jewell Garza:

Reading a book to become new life style in this season; every people loves to read a book. When you examine a book you can get a lot of benefit. When you read guides, you can improve your knowledge, since book has a lot of information on it. The information that you will get depend on what sorts of book that you have read. If you would like get information about your analysis, you can read education books, but if you want to entertain yourself look for a fiction books, this sort of us novel, comics, in addition to soon. The The Evolution Revolution - Why Thinking People are Rethinking the Theory of Evolution provide you with a new experience in reading a book.

James Furlow:

You may get this The Evolution Revolution - Why Thinking People are Rethinking the Theory of Evolution by check out the bookstore or Mall. Merely viewing or reviewing it could to be your solve challenge if you get difficulties for the knowledge. Kinds of this e-book are various. Not only by simply written or printed but in addition can you enjoy this book by e-book. In the modern era such as now, you just looking of your mobile phone and searching what their problem. Right now, choose your current ways to get more information about your reserve. It is most important to arrange you to ultimately make your knowledge are

still change. Let's try to choose correct ways for you.
