The MK-XV-A Salk class hospital ship is a specialized starship, modified from a MK-XIV transport hull. The USS Fleitas (pronounced FLAY-tuhs) is designed for first response to events ranging from space battles to planetary disasters. As such, she is capable of carrying up to four hospital pods. These pods can operate in concert with each other and the facilities aboard the mother ship, or they can be deployed independently for longer-term aid. This high-quality packet consists of six 11"x17" fold-out sheets depicting 5 external views of the ship, as well as a detailed cross-section and a sheet detailing the hospital pod.
