Developing Students' Statistical Reasoning: Connecting Research and Teaching Practice

Joan Garfield, Dani Ben-Zvi

Developing Students' Statistical Reasoning: Connecting Research and Teaching Practice Joan Garfield, Dani Ben-Zvi

Increased attention is being paid to the need for statistically educated citizens: statistics is now included in the K-12 mathematics curriculum, increasing numbers of students are taking courses in high school, and introductory statistics courses are required in college. However, increasing the amount of instruction is not sufficient to prepare statistically literate citizens. A major change is needed in how statistics is taught. To bring about this change, three dimensions of teacher knowledge need to be addressed: their knowledge of statistical content, their pedagogical knowledge, and their statistical-pedagogical knowledge, i.e., their specific knowledge about how to teach statistics. This book is written for mathematics and statistics educators and researchers. It summarizes the research and highlights the important concepts for teachers to emphasize, and shows the interrelationships among concepts. It makes specific suggestions regarding how to build classroom activities, integrate technological tools, and assess students' learning.

This is a unique book. While providing a wealth of examples through lessons and data sets, it is also the best attempt by members of our profession to integrate suggestions from research findings with statistics concepts and pedagogy. The book's message about the importance of listening to research is loud and clear, as is its message about alternative ways of teaching statistics. This book will impact instructors, giving them pause to consider: "Is what I'm doing now really the best thing for my students? What could I do better?"

J. Michael Shaughnessy, Professor, Dept of Mathematical Sciences, Portland State University, USA

This is a much-needed text for linking research and practice in teaching statistics. The authors have provided a comprehensive overview of the current state-of-the-art in statistics education research. The insights they have gleaned from the literature should be tremendously helpful for those involved in teaching and researching introductory courses.

Randall E. Groth, Assistant Professor of Mathematics Education, Salisbury University, USA

From reader reviews:

Kirsten Muncy:

What do you concerning book? It is not important to you? Or just adding material if you want something to explain what the one you have problem? How about your free time? Or are you busy individual? If you don't have spare time to do others business, it is make you feel bored faster. And you have free time? What did you do? Everyone has many questions above. They should answer that question due to the fact just their can do which. It said that about reserve. Book is familiar in each person. Yes, it is correct. Because start from on kindergarten until university need this Developing Students' Statistical Reasoning: Connecting Research and Teaching Practice to read.

Joseph Woodruff:

The knowledge that you get from Developing Students' Statistical Reasoning: Connecting Research and Teaching Practice may be the more deep you excavating the information that hide in the words the more you get interested in reading it. It doesn't mean that this book is hard to recognise but Developing Students' Statistical Reasoning: Connecting Research and Teaching Practice giving you excitement feeling of reading. The writer conveys their point in particular way that can be understood by means of anyone who read it because the author of this book is well-known enough. This specific book also makes your vocabulary increase well. So it is easy to understand then can go with you, both in printed or e-book style are available. We recommend you for having this Developing Students' Statistical Reasoning: Connecting Research and Teaching Practice instantly.

Elaine Harvey:

Beside this particular Developing Students' Statistical Reasoning: Connecting Research and Teaching Practice in your phone, it may give you a way to get nearer to the new knowledge or facts. The information and the knowledge you may got here is fresh through the oven so don't end up being worry if you feel like an old people live in narrow town. It is good thing to have Developing Students' Statistical Reasoning: Connecting Research and Teaching Practice because this book offers for you readable information. Do you often have book but you would not get what it's facts concerning. Oh come on, that wil happen if you have this within your hand. The Enjoyable blend here cannot be questionable, including treasuring beautiful island. Use you still want to miss this? Find this book in addition to read it from currently!

Gary Carter:

Don't be worry for anyone who is afraid that this book will probably filled the space in your house, you can have it in e-book method, more simple and reachable. This Developing Students' Statistical Reasoning: Connecting Research and Teaching Practice can give you a lot of close friends because by you looking at this one book you have issue that they don't and make you more like an interesting person. This book can be one of one step for you to get success. This e-book offer you information that perhaps your friend doesn't

recognize, by knowing more than other make you to be great people. So , why hesitate? We need to have
