Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series) Bud Fox Ph.D., Zhang Wenzu Ph.D., Tan May Ling M.Sc.

Software Application Development: A Visual C++, MFC, and STL Tutorial provides a detailed account of the software development process using Visual C++, MFC, and STL. It covers everything from the design to the implementation of all software modules, resulting in a demonstration application prototype which may be used to efficiently represent mathematical equations, perform interactive and intuitive model-building, and conduct control engineering experiments.

All computer code is included, allowing developers to extend and reuse the software modules for their own project work. The book's tutorial-like approach empowers students and practitioners with the knowledge and skills required to perform disciplined, quality, real-world software engineering.

From reader reviews:

Melvin Bragg:

As people who live in the modest era should be change about what going on or info even knowledge to make all of them keep up with the era that is certainly always change and move forward. Some of you maybe may update themselves by examining books. It is a good choice in your case but the problems coming to you is you don't know what kind you should start with. This Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series) is our recommendation to help you keep up with the world. Why, because this book serves what you want and wish in this era.

Anna Sanders:

The guide with title Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series) has lot of information that you can study it. You can get a lot of gain after read this book. This book exist new knowledge the information that exist in this reserve represented the condition of the world right now. That is important to yo7u to learn how the improvement of the world. This particular book will bring you inside new era of the glowbal growth. You can read the e-book on your smart phone, so you can read it anywhere you want.

Bradford Padgett:

In this time globalization it is important to someone to acquire information. The information will make anyone to understand the condition of the world. The healthiness of the world makes the information easier to share. You can find a lot of references to get information example: internet, classifieds, book, and soon. You will see that now, a lot of publisher this print many kinds of book. Often the book that recommended for your requirements is Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series) this book consist a lot of the information in the condition of this world now. This kind of book was represented how can the world has grown up. The language styles that writer use to explain it is easy to understand. Typically the writer made some analysis when he makes this book. Honestly, that is why this book ideal all of you.

Annmarie Windham:

As we know that book is important thing to add our expertise for everything. By a guide we can know everything you want. A book is a group of written, printed, illustrated or maybe blank sheet. Every year seemed to be exactly added. This book Software Application Development: A Visual C++, MFC, and STL Tutorial (Chapman & Hall/CRC Computer and Information Science Series) was filled with regards to science. Spend your free time to add your knowledge about your scientific disciplines competence. Some people has distinct feel when they reading a new book. If you know how big good thing about a book, you

can experience enjoy to read a book. In the modern era like right now, many ways to get book that you wanted.
