**Design and Analysis of Large Lithium-ion Battery Systems (Power Engineering)** Shiram Santhanagopalan, Kandler Smith, Jeremy Neubauer, Kim Gi-heon, Ahmad Pescaran

This new resource provides you with an introduction to battery design and test considerations for large-scale automotive, aerospace, and grid applications. It details the logistics of designing a professional, large, Lithium-ion battery pack, primarily for the automotive industry, but also for non-automotive applications. Topics such as thermal management for such high-energy and high-power units are covered extensively, including detailed design examples. Every aspect of battery design and analysis is presented from a hands-on perspective. The authors work extensively with engineers in the field and this book is a direct response to frequently-received queries. With the authors' unique expertise in areas such as battery thermal evaluation and design, physics-based modeling, and life and reliability assessment and prediction, this book is sure to provide you with essential, practical information on understanding, designing, and building large format Lithium-ion battery management systems. Market Automotive, aerospace, and power engineers; Researchers and students.

**From reader reviews:**

**Nancy Adams:**

Do you have favorite book? In case you have, what is your favorite's book? Book is very important thing for us to understand everything in the world. Each reserve has different aim as well as goal; it means that reserve has different type. Some people feel enjoy to spend their a chance to read a book. These are reading whatever they take because their hobby is actually reading a book. Think about the person who don't like looking at a book? Sometime, man feel need book whenever they found difficult problem or even exercise. Well, probably you will need this Design and Analysis of Large Lithium-ion Battery Systems (Power Engineering).

**Edward Peterson:**

Reading a book tends to be new life style on this era globalization. With studying you can get a lot of information that can give you benefit in your life. Having book everyone in this world can certainly share their idea. Books can also inspire a lot of people. Lots of author can inspire their own reader with their story or maybe their experience. Not only situation that share in the guides. But also they write about the knowledge about something that you need instance. How to get the good score toefl, or how to teach your children, there are many kinds of book that exist now. The authors on this planet always try to improve their talent in writing, they also doing some research before they write on their book. One of them is this Design and Analysis of Large Lithium-ion Battery Systems (Power Engineering).

**Juana Houck:**

Reading can called brain hangout, why? Because when you find yourself reading a book particularly book entitled Design and Analysis of Large Lithium-ion Battery Systems (Power Engineering) the mind will drift away trough every dimension, wandering in each aspect that maybe not known for but surely will end up your mind friends. Imaging every word written in a reserve then become one application form conclusion and explanation which maybe you never get before. The Design and Analysis of Large Lithium-ion Battery Systems (Power Engineering) giving you yet another experience more than blown away your brain but also giving you useful info for your better life in this particular era. So now let us show you the relaxing pattern is your body and mind will likely be pleased when you are finished reading it, like winning a game. Do you want to try this extraordinary spending spare time activity?

**Kara Hogan:**

Is it you who having spare time after that spend it whole day by watching television programs or just telling lies on the bed? Do you need something totally new? This Design and Analysis of Large Lithium-ion Battery Systems (Power Engineering) can be the answer, oh how comes? It's a book you know. You are so out of date, spending your free time by reading in this brand new era is common not a nerd activity. So what these

publications have than the others?
