Radio Network Planning and Optimisation for UMTS

Radio Network Planning and Optimisation for UMTS

Radio Network Planning and Optimisation for UMTS, Second Edition, is a comprehensive and fully updated introduction to WCDMA radio access technology used in UMTS, featuring new content on key developments. Written by leading experts at Nokia, the first edition quickly established itself as a best-selling and highly respected book on how to dimension, plan and optimise UMTS networks. This valuable text examines current and future radio network management issues and their impact on network performance as well as the relevant capacity and coverage enhancement methods.

In addition to coverage of WCDMA radio access technology used in UMTS, and the planning and optimisation of such a system, the service control and management concept in WCDMA and GPRS networks are also introduced. This is an excellent source of information for those considering future cellular networks where Quality of Service (QoS) is of paramount importance.

Key features of the Second Edition include:

- High-Speed Downlink Packet Access (HSDPA) – physical layer, dimensioning and radio resource management
- Quality of Service (QoS) mechanisms in network for service differentiation
- Multiple Input – Multiple Output (MIMO) technology
- Practical network optimisation examples
- Service optimisation for UMTS and GPRS/EDGE capacity optimisation
- The ‘hot topic’ of service control and management in WCDMA and GPRS networks, that has evolved since the first edition

Companion website includes:

- Figures
- Static radio network simulator implemented in MATLAB®

This text will have instant appeal to wireless operators and network and terminal manufacturers. It will also be essential reading for undergraduate and postgraduate students, frequency regulation bodies and all those interested in radio network planning and optimisation, particularly RF network systems engineering professionals.

From reader reviews:

Fred Swett:

The book Radio Network Planning and Optimisation for UMTS give you a sense of feeling enjoy for your spare time. You can use to make your capable considerably more increase. Book can being your best friend when you getting stress or having big problem with your subject. If you can make examining a book Radio Network Planning and Optimisation for UMTS to get your habit, you can get far more advantages, like add your capable, increase your knowledge about several or all subjects. You could know everything if you like wide open and read a reserve Radio Network Planning and Optimisation for UMTS. Kinds of book are a lot of. It means that, science guide or encyclopedia or others. So , how do you think about this e-book?

Kori Pierson:

Information is provisions for people to get better life, information nowadays can get by anyone in everywhere. The information can be a knowledge or any news even a concern. What people must be consider if those information which is within the former life are difficult to be find than now could be taking seriously which one is suitable to believe or which one the resource are convinced. If you get the unstable resource then you have it as your main information you will see huge disadvantage for you. All those possibilities will not happen inside you if you take Radio Network Planning and Optimisation for UMTS as your daily resource information.

Nancy Jones:

Spent a free time to be fun activity to complete! A lot of people spent their down time with their family, or their particular friends. Usually they undertaking activity like watching television, about to beach, or picnic inside park. They actually doing same thing every week. Do you feel it? Do you need to something different to fill your free time/ holiday? May be reading a book might be option to fill your free time/ holiday. The first thing you will ask may be what kinds of book that you should read. If you want to try look for book, may be the reserve untitled Radio Network Planning and Optimisation for UMTS can be fine book to read. May be it may be best activity to you.

Lillie Corley:

Reading can called imagination hangout, why? Because if you are reading a book specifically book entitled Radio Network Planning and Optimisation for UMTS the mind will drift away trough every dimension, wandering in each aspect that maybe unfamiliar for but surely will end up your mind friends. Imaging every word written in a publication then become one form conclusion and explanation that will maybe you never get before. The Radio Network Planning and Optimisation for UMTS giving you yet another experience more than blown away your head but also giving you useful info for your better life in this era. So now let us demonstrate the relaxing pattern here is your body and mind are going to be pleased when you are finished reading through it, like winning an activity. Do you want to try this extraordinary spending spare time activity?
