On Certain L -Functions (Clay Mathematics Proceedings) James Arthur

This volume constitutes the proceedings of a conference, "On Certain L -functions", held July 23-27, 2007 at Purdue University, West Lafayette, Indiana. The conference was organized in honor of the 60th birthday of Freydoon Shahidi, widely recognized as having made groundbreaking contributions to the Langlands program. The articles in this volume represent a snapshot of the state of the field from several viewpoints. Contributions illuminate various areas of the study of geometric, analytic, and number theoretic aspects of automorphic forms and their L -functions, and both local and global theory are addressed. Topics discussed in the articles include Langlands functoriality, the Rankin-Selberg method, the Langlands-Shahidi method, motivic Galois groups, Shimura varieties, orbital integrals, representations of p -adic groups, Plancherel formula and its consequences, the Gross-Prasad conjecture, and more. The volume also includes an expository article on Shahidi's contributions to the field, which serves as an introduction to the subject. Experts will find this book a useful reference, and beginning researchers will be able to use it to survey major results in the Langlands program. Titles in this series are co-published with the Clay Mathematics Institute (Cambridge, MA).

From reader reviews:

Todd Crain:

The book On Certain \mathbb{L} -Functions (Clay Mathematics Proceedings) gives you the sense of being enjoy for your spare time. You may use to make your capable much more increase. Book can being your best friend when you getting strain or having big problem together with your subject. If you can make reading through a book On Certain \mathbb{L} -Functions (Clay Mathematics Proceedings) for being your habit, you can get much more advantages, like add your own personal capable, increase your knowledge about a few or all subjects. You could know everything if you like start and read a reserve On Certain \mathbb{L} -Functions (Clay Mathematics Proceedings). Kinds of book are a lot of. It means that, science guide or encyclopedia or other individuals. So , how do you think about this e-book?

Kenneth Handy:

The book with title On Certain \mathbb{L} -Functions (Clay Mathematics Proceedings) has a lot of information that you can understand it. You can get a lot of gain after read this book. This specific book exist new expertise the information that exist in this guide represented the condition of the world currently. That is important to yo7u to learn how the improvement of the world. This kind of book will bring you throughout new era of the syndication. You can read the e-book with your smart phone, so you can read it anywhere you want.

Mark Mata:

The reason? Because this On Certain \mathbb{L} -Functions (Clay Mathematics Proceedings) is an unordinary book that the inside of the guide waiting for you to snap that but latter it will zap you with the secret the item inside. Reading this book alongside it was fantastic author who have write the book in such wonderful way makes the content inside of easier to understand, entertaining approach but still convey the meaning totally. If I were you I will go to the guide store hurriedly.

Marsha Bridges:

Many people said that they feel bored when they reading a book. They are directly felt it when they get a half elements of the book. You can choose often the book On Certain \mathbb{L} -Functions (Clay Mathematics Proceedings) to make your reading is interesting. Your personal skill of reading expertise is developing when you including reading. Try to choose easy book to make you enjoy to learn it and mingle the feeling about book and reading through especially. It is to be initially opinion for you to like to available a book and examine it. Beside that the book On Certain \mathbb{L} -Functions (Clay Mathematics Proceedings) can be your brand-new friend when you're experience alone and confuse in doing what must you're doing of that time.
