Personality Psychology: Domains of Knowledge About Human Nature

Randy Larsen, David Buss

Personality Psychology: Domains of Knowledge About Human Nature Randy Larsen, David Buss

Larsen and Buss's Personality Psychology is based on a framework of six important domains of knowledge about personality functioning. These six domains are the dispositional domain (traits, trait taxonomies, and personality dispositions over time), the biological domain (physiology, genetics, evolution), the intrapsychic domain (psychodynamics, motives), the cognitive/experiential domain (cognition, emotion, and the self), the social and cultural domain (social interaction, gender, and culture), and the adjustment domain (stress, coping, health, and personality disorders). This book is based on the notion that these domains of knowledge represent the organizing structure of contemporary personality psychology.
