Hearing and Sound Communication in Fishes (Proceedings in Life Sciences)

Hearing and Sound Communication in Fishes (Proceedings in Life Sciences)

This volume is a compilation of the papers presented at a meeting that took place in April 1980 at the Mote Marine Laboratory, Sarasota, Florida. The meeting and this volume are outgrowths of two earlier international meetings on marine bio-acoustics that occurred in 1963 and 1966 (Tavolga 1964, 1967). The first meeting took place at the Lerner Marine Laboratory of the American Museum of Natural History, while the second meeting was at the American Museum itself, and was under the sponsorship of the Department of Animal Behavior. It is apparent that these two volumes have had immense impact on the current study of marine bio-acoustics, and particularly on fish audition. In a preliminary conference in Sarasota in 1979 we decided that it was time for another such meeting, to bring together as many as possible of the investigators interested in fish acoustics in order to assess the current state of our knowledge and predict directions for research for the next several years. Such a meeting appeared par ticularly timely, since over the past four or five years there have been many new studies that have provided new empirical and theoretical work on basic mechanisms of fish audition. Furthermore, it became evident, as we made up preliminary lists of possible participants, that few of the currently active workers were in the field back in 1966. In fact, of the current participants, only Drs.

From reader reviews:

Nicole Marcil:

Often the book Hearing and Sound Communication in Fishes (Proceedings in Life Sciences) will bring one to the new experience of reading a book. The author style to elucidate the idea is very unique. When you try to find new book you just read, this book very suited to you. The book Hearing and Sound Communication in Fishes (Proceedings in Life Sciences) is much recommended to you you just read. You can also get the e-book from official web site, so you can easier to read the book.

Cynthia Medina:

Are you kind of hectic person, only have 10 or maybe 15 minute in your day time to upgrading your mind ability or thinking skill perhaps analytical thinking? Then you are experiencing problem with the book in comparison with can satisfy your short period of time to read it because all this time you only find guide that need more time to be examine. Hearing and Sound Communication in Fishes (Proceedings in Life Sciences) can be your answer as it can be read by a person who have those short spare time problems.

Kenneth Salinas:

Do you like reading a e-book? Confuse to looking for your chosen book? Or your book was rare? Why so many query for the book? But any people feel that they enjoy intended for reading. Some people likes reading, not only science book and also novel and Hearing and Sound Communication in Fishes (Proceedings in Life Sciences) or others sources were given information for you. After you know how the truly great a book, you feel want to read more and more. Science book was created for teacher or students especially. Those guides are helping them to include their knowledge. In some other case, beside science publication, any other book likes Hearing and Sound Communication in Fishes (Proceedings in Life Sciences) to make your spare time much more colorful. Many types of book like here.

Alexandra Robbins:

What is your hobby? Have you heard which question when you got college students? We believe that that issue was given by teacher to the students. Many kinds of hobby, All people has different hobby. And you also know that little person just like reading or as examining become their hobby. You must know that reading is very important as well as book as to be the thing. Book is important thing to add you knowledge, except your personal teacher or lecturer. You find good news or update with regards to something by book. Amount types of books that can you choose to adopt be your object. One of them are these claims Hearing and Sound Communication in Fishes (Proceedings in Life Sciences).
